The many friends here of Bert Perry, formerly of this town, now of Dumfries, will be saddened to know that he suffered another shock of paralysis last week Thursday, and when last heard from was unable to speak, although conscious.

The high school's Halloween ball at the town hall Friday evening was a most successful one. The attendance was large, including guests from other towns, and the receipts were sufficient to leave a surplus. The dancing was furnished by the band, and continued until 2 o'clock, and during the evening refreshments were served.

Former students of the high school who returned to participate in the festivities of the Halloween party Friday evening were John Fisher of the state college at Durham, Alfred Walker of the United States navy, Miss Christine Robertson of the Duffy boarding school at Springfield, Mass., and Roy Taylor of the Bryant & Stratton business college in Boston.

The supper and entertainment at the Congregational church Wednesday evening, the proceeds of which the ladies had voted to turn over to Mr. Booth to be used for the benefit of the choir for music, etc., netted a rather small sum. The supper was well patronized, but unfortunately for the affair the band minstrel show was the following evening and a full dress rehearsal for the dance and minstrel talent that had been relied on for the church entertainment. However, those who were able to be there very pleasantly entertained the audience who remained for the evening.

The tendency in naval construction is to build heavier ships than have ever been seen, to make these ships as speedy as possible, and to arm them with the heaviest guns. This tendency, it is interesting to know, is not a result of the Russo-Japanese war. Though emphasized and advanced by the engagements that have taken place in Oriental waters, nevertheless the tendency antedates the war. It is to be seen in the battleship Vermont, which was recently launched at the Fore River yards at Quincy, and which has a displacement of 16,000 tons and will carry four 12-inch, eight eight-inch, and 13 seven-inch guns. It is also armed with the new British battleships of the King Edward class, which have a displacement of more than 16,000 tons and which carry four 12-inch, four 8.5-inch and 10 six-inch guns.—Boston Times.
